New to London Transport LS274 03/1979

YYE274T was new to London Transports as LS274.

From the 1980's until the mid 2000's YYE274T worked for various companies including Eastbourne Buses and more famously Chase Bus in the West Midlands before Arriva took over the operations in 2007.

It then ended up with a farm in Staffordshire used for staff shuttle services and was painted green during this time.

By 2014 it was fully restored by avid enthusiast Oliver Foskor who privately owned and restored it into Eastern Counties tomato soup livery which it wears today.

It then passed into another private consortium in 2019 where it remained until the ECBPG was approached to purchase it 2021. Thanks to some supporting members we successfully achieved this.

YYE274T joined us in March 2020 and became an asset of the group in August 2021 after purchasing it from its former owner(s).
